

Wildfire Coexistence in BC: Solutions Symposium

June 3-5, 2024

UBC Okanagan, Kelowna

Blazing Paths for Proactive Change, Igniting Transformative Solutions

LEARN MORE

This Symposium will bring together British Columbia's leading wildfire experts and practitioners to highlight the urgent need to develop a transformative vision and implementation strategy for wildfires before it is too late. We will shed light on the profound impacts of wildfires and tremendous costs to the BC population, emphasizing that the 2017-2023 fire seasons were not an anomaly but a new and escalating reality fueled by climate change.

Join our leading experts who will expose the stark realities of the societal, health, cultural, environmental, and economic costs of wildfires across British Columbia.
